

INDEX TO VOLUME 30

A

- Abell, R. G., Chambers, R., Clowes, G. H. A., and Zweifach, B. W., 212*
- Acetylcholine, stimulating effect of, on mammalian heart and liberation of an epinephrine-like substance by isolated heart, 627*
- Acevedo, H. J., and Moia, B., 532*
- Adrenalin, study of body temperature and water content in shock produced by continuous intravenous injection of, with or without anesthesia, 106*
- Adults, young, traumatic rupture of normal aorta in, 321
- Age, older group, with coronary arteriosclerosis and hypertension, effect of smoking cigarettes on peripheral blood flow in subjects in, 541
- relation of, and other factors to cardiac subendothelial hemorrhage in dogs, 592
- Ageing, influence of, in man upon his capacity for physical work and upon his cardiovascular response to exercise, 102*
- Air, cold, effects of, on air passages and lungs, 101*
- Alexander, H. L., and Wilson, K. S., 210*
- Alexander, R. S., 314*
- Allmark, M. G., and Bachinski, W. M., 633*
- Aminophylline (See Ethylenediamine)
- Amyl nitrite, effects of, on downward T wave of electrocardiogram, 60
- measurement of lung-to-face time by, 19
- Anemia, chronic, as measured by technique of right atrial catheterization, cardiac output in patients with, 420*
- Anesthesia and environmental temperature, effect of, on survival of tourniquet shock in rabbits, 106*
- sodium pentobarbital, effect of sulfadiazine, antitoxins, globulins, and dog plasma on dogs in traumatic shock under, 106*
- study of body temperature and water content in shock produced by continuous intravenous injections of adrenalin, with or without, 106*
- Aneurysm, arteriovenous, modification of respiration and circulation in, 211*
- cardiac, with rupture, 133
- spontaneous, 567
- congenital arteriovenous, 209*
- mycotic, death from rupture of; case of infection with *Brucella suis*, causing endocarditis and nephritis, 77
- periarteritis nodosa producing, of the renal artery and hypertension, 211*
- pulmonary artery, hemorrhagic telangiectasia with, 534*
- Angina pectoris associated with dextrocardia and situs inversus, 202
- on use of theophylline aminoisobutanol in, 633*
- with particular reference to its occurrence before and after myocardial infarction, 599
- Announcement, 425, 539
- Anomalies, genitourinary and associated vascular, aortic hypoplasia with, 514
- Anomaly, congenital, angina pectoris associated with dextrocardia and situs inversus, 202
- arteriovenous aneurysms, 209*
- coarctation of aorta, relating clinical data to degree of constriction measured at autopsy, with a method of standardization for related measurements, 30
- cor triloculare biauricular, 209*
- interventricular septal defect (Roger's disease) occurring in mother and her six-month fetus, 54
- large interauricular septal defect with particular reference to diagnosis and longevity, 103*
- Anoxia and blood flow, effects of, on spinal cardiovascular centers, 314*
- Antitoxins, globulins, sulfadiazine, and dog plasma, effect of, on dogs in traumatic shock under sodium pentobarbital anesthesia, 106*
- Anxiety and tilting, normal values with observations on effect of; cardiac output in male subjects as measured by technique of right atrial catheterization, 315*
- Aorta, coarctation of; relating clinical data to degree of constriction measured at autopsy, with method of standardization for related measurements, 30
- hypoplasia of, with associated vascular and genitourinary anomalies, 514
- normal, in young adults, traumatic rupture of, 321
- simplified technique for removal of saddle embolus at bifurcation of, with report of successful case; arterial embolism, 107*
- Aortic atresia or marked hypoplasia of aorta at its base, clinical and pathological findings in, 209*
- Armstrong, C. D., Kirby, W. M. M., and Bloomfield, A. L., 423
- Arrillaga, F. C., 424*
- Arsenotherapy, intensive, electrocardiographic changes in early syphilis prior to and upon completion of, 551
- Arteriosclerosis, coronary, and myocardial infarction as studied by injection technique, 210*

An asterisk (*) after a page number indicates the reference is an abstract and not an original article.

- Artery, coronary arteriosclerosis and hypertension, effect of smoking cigarettes on the peripheral blood flow in subjects in older age group with, 541
and myocardial infarction as studied by injection technique, 210*
disease of, rupture of ventricular myocardium, with comments on clinical significance of possibility of, 39
occlusion of, and transient heart block in pleural shock, 423*
system with neoprene latex, demonstration of, 212*
disease, generalized, in Negroes, new form of, 390
embolism of; simplified technique for removal of saddle embolus at bifurcation of aorta with report of successful case, 107*
pulmonary, aneurysm of, hemorrhagic telangiectasia with, 534*
sclerosis and right heart failure, primary alveolar cell carcinoma of lung with, 309
renal, and hypertension, periarteritis nodosa producing aneurysm of, 211*
Arthritis, postscarlatinal, and carditis, relationship of, to rheumatic fever, 629*
Ashman, R., Ferguson, F. P., Gremillion, A. I., and Byer, E., 208*
Askey, John Martin, and Neurath, O., 253
Asthenia, neurocirculatory, studies concerning pathogenesis and etiology of; II. Mechanisms underlying giddiness found in patients with neurocirculatory asthenia, 325
III. Cardiovascular manifestations of neurocirculatory asthenia, 478
IV. Respiratory manifestations of neurocirculatory asthenia, 557
Asthma, bronchial, and other forms of human hypersensitiveness, relation of periarteritis nodosa to, 210*
Auricle, left, primary tumor of, simulating mitral stenosis, 230
output in normal subjects with observations on acute circulatory collapse in three instances, effect of venesection and pooling of blood in extremities on atrial pressure, and, 421*
right catheterization, technique of cardiac output in male subjects as measured by; normal values with observations on effect of anxiety and tilting, 315*
technique of right, catheterization, cardiac output in patients with chronic anemia as measured by, 420*
A-V nodal rhythm with varying A-V block, unusual case of, 208*
Axis, medium manifest, of unipolar derivation of extremities, determination of, 208*
systems, six, with application to vector AvT in ventricular hypertrophy, 208*
- B
Bachinski, W. M., and Allmark, M. G., 633*
Bain, C. W., 107*
Baker, Hillier, L., Jr., Mokotoff, R., Mokotoff, G., and Katz, L. M., 215
Barber, Donn J., and Stein, I., 118
Barium chloride, effect of, on heart, 633*
Barnes, A. R., Essex, H. E., and Pruitt, R. D., 422*
—, and May, R. M., 65
Barnes, M. W., Joliffe, L. S., Finland, M., and Parker, F., Jr., 104*
Bauer, Donald deF., and Iverson, L., 30
Baum, Harry, Dimond, G., and Bond, G., 194
Beggenstoss, A. H., Call, J. D., and Merritt, W. A., 104*
Benatt, A. J., and Berg, W. F., 579
Bennett, A. W., and Greene, J. A., 415
Berconsky, I., and Cossio, P., 629*
Berg, W. F., and Benatt, A. J., 579
Berger, Knute E., and Reed, L. K., 622
Berk, Lionel, and Sapeika, N., 365
Bernheim, syndrome of, 427
Betsch, William F., 567
Black, W. A., and Karpovich, P. V., 627*
Blair, H. A., and Wedd, A. M., 633*
Blood, arterial, after intravenous injection of labeled corpuscles, dilution curve of activity in, 1
flow and anoxia, effects of, on spinal cardiovascular centers, 314*
coronary, control of, in denervated isolated heart and heart-lung preparation of dog, 317*
in upper extremity, venous pressure as index of, 210*
peripheral, in subjects in older age group with coronary arteriosclerosis and hypertension, effect of smoking cigarettes on, 541
venous, in inferior vena cava, influence of abdominal and thoracic pressure upon, 315*
pooling of, in extremities, and venesection, effect of, on atrial pressure and cardiac output in normal subjects with observations on acute circulatory collapse in three instances, 421*
pressure in inferior vena cava, intraabdominal pressure and, 420*
transient "0" diastolic brachial (indirect), associated with normal or elevated popliteal pressure, tachycardia, and nervous tension, 381
venous as index of blood flow in upper extremity, 210*
vessels, injection technique, coronary arteriosclerosis and myocardial infarction as studied by, 210*
major, of lower extremity, experience with lumbar sympathetic ganglionectomy for wounds of, 534*
peripheral, in tourniquet shock, role of decompensatory reactions of, 212*

- Blood—Cont'd
 volume deficiency, treatment of hemorrhagic shock irreversible to replacement of (x); traumatic shock, 535*
 determinations with radioactive phosphorus, 318*
 of normal young men, effect of bed rest on, 631*
- Bloom, Nathan, and Cashion, G., 619
- Bloomfield, A. L., Armstrong, C. D., and Kirby, W. M. M., 423*
- Body fluids of dogs in traumatic shock, distribution of, 213*
 temperature and water content in shock produced by continuous intravenous injection of adrenalin, with or without anesthesia, study of, 106*
- Bond, George, Baum, H., and Dimond, G., 194
- Book reviews:
 Electrocardiography, primer of, 537
 Heart, disease of, 425
 Voluntary health agencies, 425
- Borts, Irving H., DeGowin, E. L., and Carter, J. R., 77
- Bourne, G., 319*
- Bradycardia, sinus, with cardiac asystole, 316*
- Brain abscess associated with congenital heart disease, 209*
- Brannon, E. S., Merrill, A. J., Warren, J. V., and Stead, E. A., Jr., 315,* 420,* 421*
- Brodsky, M. B., Rodriguex, G. C., Del Solar, A. V., and Dussailant, G. G., 213*
- Brown, Halla, Stewart, H. J., and Haskell, H. S., 541
- Brucella*, endocarditis due to, 104*
suis, case of infection with, causing endocarditis and nephritis; death from rupture of mycotic aneurysm, 77
- Burch, George, and Winsor, T., 537 (B. rev.)
- Burrett, J. B., and White, P. D., 103*
- Burton, C. R., 259
- Byer, E., Ashman, R., Ferguson, F. P., and Gremillion, A. I., 208*

- Calef, Benson, and Saland, G., 398
- Call, J. D., Beggenstoss, R. H., and Merritt, W. A., 104*
- Cameron, D. R., 423*
- Campbell, William A., and McDonald, J. B., 321
- Canabal, Eduardo Joaquin, Warneford-Thomson, H. F., and White, P. D., 189
- Canada, present status of standardization of digitalis and strophanthus products in, 633*
- Carcinoma, primary alveolar cell, of lung with pulmonary artery sclerosis and right heart failure, 309
- Cardiovascular centers, spinal, effects of blood flow and anoxia on, 314*
 damage done, reversibility of, by nearly complete exsanguination, 534*
 manifestations of neurocirculatory asthenia (III); studies concerning the etiology and pathogenesis of neurocirculatory asthenia, 478
 response to exercise, influence of aging in man upon his capacity for physical work and upon, 102*
 rheumatism, value of iontophoresis with sodium salicylate in, 633*
- Cardioelectrography, principle of, 532*
- Carditis and postscarlatinal arthritis, relationship of, to rheumatic fever, 629*
- Carter, John R., Borts, I. H., and DeGowin, E. L., 77
- Cashion, Grace, and Bloom, N., 619
- Cerberin, clinical observation with, 194
- Chambers, R., Clowes, G. H. A., Zweifach, B. W., and Abell, R. G., 212*
- Chapman, Don W., 276
- Chavez, N., and Guerra, F., 633*
- Children, overweight and adolescent, significance of erythrocyte sedimentation rate in rheumatic fever in, 533*
 salicylate therapy in rheumatic fever in, 424*
- Cigarettes, effect of smoking, on the peripheral blood flow in subjects in older age group with coronary arteriosclerosis and hypertension, 541
- Circulation and respiration in arteriovenous aneurysm, modification of, 211*
- bilateral, venous occlusion of hind-limbs of dog, observations on shock following, 212*
- collapse, acute, in three instances, effect of venesection and pooling of blood in extremities on atrial pressure and cardiac output in normal subjects with observations on, 421*
- coronary, insufficiency of, revealed by ectopic, nodal, and ventricular beats in presence of left bundle branch block, 209*
 in acute myocardial infarction, 631*
 postocclusive collateral, primary influence of basal vascular tone on development of, and in selecting patients for sympathectomy, 107*
 time, determination of; unsuitability of papaverine, 365
 dilution curve of activity in arterial blood after intravenous injection of labeled corpuscles, 1
 lung-to-face, measurement of, by amyl nitrite, 19
- City of Mexico, frequency of congenital anatomic lesions of heart in, 316*
- Clowes, G. H. A., Zweifach, B. W., Abell, R. G., and Chambers, R., 212*

- Coarctation of aorta; relating clinical data to degree of constriction measured at autopsy with method of standardization for related measurements, 30
- Condenser field, modulated high-frequency, effect of, on Straub-Fuehner frog heart preparation, 420*
- Conduction system, total, sinus extrasystole with consecutive disturbance of condition in, 628*
- Cookson, H., 316*
- Cor trilobulare biauriculare, 209*
- Corpuscles, labeled, dilution curve of activity in arterial blood after intravenous injection of, 1
- Cossio, P., and Bereconsky, I., 629*
- Costa Rica and New York, relative incidence of rheumatic valve disease in, and its bearing on rheumatic origin of calcareous aortic stenosis, 573
- Costero, and Fuertes, G. A., 316*
- Cramps, night, and so-called vasomotor neurosis of extremities, treatment of, with quinine, 632*

- II. Effect of radical lumbodorsal sympathectomy, 165
- III. Electrocardiograms of hypertensive patients followed for long time without splanchnic resection in comparison with those in patients who had had splanchnic resection, 189
- in pneumoperitoneum, 579
- infarct, and veronal poisoning, 632*
- P-R interval in rheumatic fever, provocative prolongation of, 104*
- precordial, changes in, produced by extension of anteroseptal myocardial infarction, 11
- type S₁ S₂ S₃, certain considerations concerning, 421*
- Electrocardiograms simulating posterior myocardial infarction after cessation of paroxysmal tachycardia, 401
- Electrocardiographic changes associated with lesions in deeper layers of myocardium, 422*
- in early syphilis prior to and upon completion of intensive arsenotherapy, 551

- Electrocardiographic—Cont'd
 diagnosis of myocardial infarction complicated by branch block, 532*
 features of myocardial infarction as affected by involvement of septum and by complete and incomplete transmural involvement, 367
 localization of myocardial infarcts by injury currents and ventricular extrasystoles, 421*
 patterns, basic, in bundle branch block, 102*
- Electrogram of cardiac ventricle, interpretation of, 314*
- Embarazo, Cirugia Y, 425 (B. rev.)
- Embolic or thrombotic processes, incidence of, during immediate convalescence from acute myocardial infarction, 65
- Embolism, arterial, and thrombosis in infancy, 631*
 simplified technique for removal of saddle embolus at bifurcation of aorta with report of successful case, 107*
- Endocarditis, acute bacterial, penicillin therapy in, 423*
 and nephritis, case of infection with *Brucella suis*, causing; death from rupture of mycotic aneurysm, 77
 due to *Brucella*; report of two cases, 104*
 healed subacute bacterial, 533*
 note on serologic classification of streptococci isolated from subacute bacterial, 511
 strains of *Streptococcus viridans*, enterococci, and Group A streptococci, effect of temperature elevation on action of sulfathiazole upon (II); pathology and bacteriology of streptococcus endocarditis in relationship to sulfonamide chemotherapy, 104*
